SUMMARY

Full Stack Engineer specializing in **Next.js** and **B2B SaaS Architecture**. Proven track record of shipping production-grade applications with a focus on **Server Actions**, **Database Optimization**, and **Real-Time Systems**.

EDUCATION

Guru Nanak College

Bachelor, Computer Applications

- GPA: 8.16

Aug 2022 - May 2025

SKILLS

- **Technical Skills:** HTML, CSS, JavaScript, Next.js, Typescript, React, Node.js, PostgreSQL, Python
- **Tools:** Git, GitHub, Docker, n8n, Zapier, Supabase, Framer, Canva
- **Soft Skills:** Communication, Leadership, Critical Thinking, Creativity, Problem Solving
- **Languages:** Tamil, English

EXPERIENCE

DUTUK

Fullstack Developer

- Engineered a scalable multi-platform application using **React** and **React Native**, reducing codebase redundancy by **40%** through the implementation of reusable **TypeScript** components
- Spearheaded R&D initiatives for the founding team, establishing **Git** workflow standards that accelerated feature deployment cycles by **20%**.

May 2025 - Present

Remote

Headstarter

Software Engineer Intern

- Architected the core frontend modules for 'Zeko' (SaaS) using **React** and **TypeScript**, decreasing page load latency by **30%** and boosting user session retention
- Optimized application performance in an Agile environment, refactoring legacy code to improve cross-browser compatibility across Chrome, Firefox, and Safari.

Jul 2024 - Sep 2024

Remote

MSSRF

Software and

Hardware

Support L1(In
Office)

- Modernized the intranet using **Drupal 9** and **JavaScript**, streamlining internal communication for **100+ employees** and reducing navigation time by **50%**.
- Managed server configurations and network security protocols, achieving **99.9% uptime** for critical internal data systems.

May 2024 - Jul 2024

3rd Cross Street, Taramani Institutional Area, Taramani, Chennai, Tamil Nadu 600113

PROJECTS

Cedar Elevators

Contract Full Stack Engineer

- Engineered a hybrid **B2B/B2C E-Commerce Architecture** using **Next.js 16**, introducing a dynamic **Request for Quote (RFQ)** system that digitized the manual negotiation process and reduced quote turnaround time by **60%**.
- Implemented a secure **Business Verification Workflow** integrating **Clerk Authentication** and **Supabase Storage**, utilizing automated document validation pipelines to strictly enforce **Role-Based Access Control (RBAC)** for wholesale pricing.
- Optimized application performance by implementing **Upstash Redis** for session caching and **Pusher** for real-time order status updates, ensuring a **sub-100ms** latency for active user notifications.

Dec 2025 - Dec 2025

Dude Men's Wear

Contract Full Stack Engineer

- Architected a secure **Dual-Authentication System** separating admin and customer data using **Supabase RLS (Row Level Security)**, eliminating unauthorized access risks by enforcing strict **Role-Based Access Control (RBAC)** policies across 4 user hierarchy levels
- Engineered a comprehensive **Admin Dashboard** using **Next.js 16** and **shadcn/ui**, centralizing inventory, revenue analytics, and order fulfillment for 100+ SKUs, which reduced daily operational management time by **40%**.
- Developed a high-performance e-commerce frontend with **Tailwind CSS v4** and **React Server Components**, achieving a **98/100 Lighthouse Performance score** and reducing Time-to-Interactive (TTI) to under **200ms**.

Nov 2025 - Dec 2025

HeyProData

Contract Full Stack Engineer

- Architected a vertical professional networking platform using **Next.js 16** and **Turbopack**, orchestrating **73+ API endpoints** to manage real-time job marketplaces, social feeds, and event RSVPs for the creative industry.

Nov 2025 - Dec 2025

Remote

- Engineered a secure multi-tenant backend with **Supabase**, implementing strict **Row Level Security (RLS)** policies across 17+ core tables to protect sensitive user data (Visas, Contracts, and Credits).
- Developed a 'Slate Social' feed and 'Collab' team management system featuring **real-time notifications** and drag-and-drop file handling, achieving **90% production readiness** with comprehensive end-to-end type safety.
- Collaborated with stakeholders and refined functional requirements to deliver a complete product optimized for performance and scalability.

Time Table Management System

Feb 2025 - Mar 2025

Guru Nanak College

- Developed and designed to streamline and automate the creation and management of academic schedules.
- By automating time table management, this system aims to reduce administrative workload, minimize scheduling conflicts, and improve resource utilization within educational institutions.

Zeko

Jul 2024 - Aug 2024

Headstarter

- Developed an innovative SaaS platform enabling users to interact and have conversations with any PDF document.
- Designed a sleek, intuitive interface to enhance user experience.
- Ensured the platform is accessible on various devices and browsers.
- Implemented robust security measures to protect user data and document integrity.
